# Executive Seminar: Understanding Cyber Threats in the Boardroom

Hosted by Bank of America Merrill Lynch and the Pell Center at Salve Regina University

Tuesday, May 3, 2016  
7:30 a.m. – 11:00 a.m.

Marriott Providence Downtown  
1 Orms Street  
Providence, RI

Join us for an Executive Leadership Seminar discussing cyber threats and cyber risk management. Learn the current threats, vulnerabilities and emerging cyber trends, and how you can protect your business. This seminar is designed to help your board of directors ask the right questions of your chief information security officer, technology partners and vendors. [Register now.](#)

## Keynote Speaker

Michael Bruemmer  
Vice President  
Experian Data Breach Resolution Group

With the frequency and sophistication of security incidents continuing to advance at what seems like breakneck speed, it is essential that companies increase their data breach preparedness. Not only that, but the landscape has changed, with hackers targeting organizations for different types of data that could be used for extortion or to simply cause harm. While traditional data breach threats remain, it is important that business leaders take note of emerging trends and update their data breach response plans accordingly. To help organizations prepare for what lies ahead and ensure incident response plans are ready, Michael Bruemmer, vice president at Experian Data Breach Resolution, will discuss the current landscape and review how Experian's 2016 data breach predictions have panned out so far.
